DustChaser™

Fluorescent Leak Detection Powder

Cuts detection time by 90%

Using our specially formulated fluorescent powder and an ultra-violet black light, the Dust Chaser system quickly and efficiently pinpoints leaks in bags, seams and welds, eliminating the need for time-consuming hand-eye inspections.

Easy to use

Start by introducing Dust Chaser into the dirty air stream.

As the compound travels through the leaking areas and accumulates on the clean side of the collector.

All bags are then inspected with an ultra-violet light.

Large areas can be inspected from a single position, without need of a ladder.

The built-up compound gives of an intense fluorescent glow under the black light, pinpointing leaks in bags, seams and welds, and identifying future problem areas, eliminating unnecessary bag changes and unscheduled down-time.

Safe and dependable

The Dust Chaser system is foolproof, non-toxic and simple to use.

This system works for wire cage, shaker, reverse air and cartridge-type collectors and is designed to ensure proper installation of new bags.

Suited to your needs

Dust Chaser is available in the following sizes:

Bags : • 2 lb 10/box • 5lb 4/box
• 10 lb 2/box

Pails : • 5 lb 4/box • 10lb 2/box
• 25 lb • 40lb

Drums : •80 lb •150 lb •300 lb

The required quantity of fluorescent Dust Chaser powder is 1 lbs / 1000 sq.ft of tissu.

Contact us for prices and delivery.

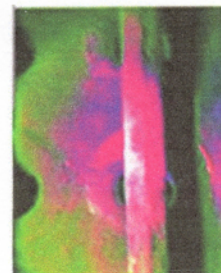

Ultra-violet light package includes :

1 Case, 1 BabyBlue3 UV Light,
1 Glasses (ANSI) that augment fluorescent effect,
1 Battery 2200mAh 3h lasting,
1 AC Charger (120 Volts), 1 DC Charger (12 volts)

Available in these colours

	Pink		Red
	Green		White*
	Orange		Tangerine
	Yellow		Lime
	Violet		*special order

Formula to calculate the required quantity (in lbs)

$$\frac{\text{Bag diameter (po)} \times \text{Bag length (po)} \times 3.1416 \times \text{Nb of bags}}{144\,000}$$
